

SH-13

1/2

SIDING BOARD FOR DRAINED AND BACK VENTILATED RAINSCREEN SYSTEMS

ISOMETRIC VIEW

DESCRIPTION

SH-13 is a durable aluminum architectural board, which can be installed both vertically and horizontally.

SPECIFICATIONS

- > Quick installation; customizable on site.
- > Non-combustible panels.
- > Durable and fully recyclable once it reaches the end of its useful life.
- > Eco-friendly (solvent-free) powder coating providing more stable and resistant colours over time.

USAGE

- > Outdoor use as exterior wall siding.*†
- > Indoor use as decorative boards.

* To use these boards in a rainscreen system, the backing wall must be designed according to local building codes and standards in force by a competent building envelope professional.

† For buildings of 20 m [65'-6"] or less in height with static wind pressures of 1.25 kPa [26 psf] or less. For any other application, contact Hurtubise's technical service.

PERFORMANCE CRITERIA

- > Maximum transverse deflection under service loads is limited to L/60.
- > Maximum axial deflection under service loads is limited to L/180.

MATERIAL

- > Aluminum 5000 series.
2 mm [0.078"] thick.

FINISH/COLOUR

- > Electrostatic powder coating in accordance with AAMA 2603, 2604, and 2605 standards.
- > Colour at the customer's choice.
